DETAILED ACTION

Allowable

1. **Claim(s) 1-19, 31-34, 37 and 38** are allowed.

2. The following is an examiner's statement of reasons for allowance:

Regarding **claim 1**, the prior art of record fails to disclose or specifically teach a communication device initiates a session by accessing a dynamic web-based GUI and during the session, the communication device receives and displays an information indicative of a telephone call to the communication device.

It is not obvious to add during web session information indicative of a phone call as described above because the prior art would have to suggest real-time interaction with a telephone network during the session at the web-based GUI.

Regarding **claim 31**, the prior art of record fails to disclose or specifically teach an internet protocol controller, comprising a number of appearances corresponding to an equal number of office telephones at the PBX, and the internet controller being coupled to the PBX system and configured to translate telephone-related information to an office telephone into one or more packets for transmission over a network to a web server.

It is not obvious to add an equal number of appearances corresponding to an equal number telephones as described above because the prior art would have to

Art Unit: 2645

suggest that all the telephones of the PBX would appear at the controller to translate information to an office telephone for a remote access.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
